

FLEXIFI - YOUR CONNECTIVITY EXPERTS

Full Fibre Connectivity for your Development

Connectivity is at the heart of our everyday lives. So it is essential to make sure your new development and refurbishment projects have the best telecoms infrastructure.

With over 50 years of experience in BT/ Openreach we specialise in delivering fibre infrastructure to new and existing commercial and residential developments. This ensures access to the highest broadband speeds for fast and reliable internet services, from your chosen communications provider.

Independent case studies have shown fibre infrastructure increases premise value by around 3%. Flexifi manage that investment for you by helping negate some of the many potential issues in delivering a successful telecoms solution;

- > **timescales**
- > **traffic management**
- > **blockages**
- > **local authority permissions**
- > **network diversions**
- > **wayleaves**
- > **contract, supplier and Openreach Ltd management**

Duct blockage traced on planning visit, saving return visits from Openreach and over 4 weeks in delivery lead time.

We prepare all internal cabling, containment, power requirement and positioning prior to final terminations. We can manage existing circuit shifts as required.

FLEXIFI - YOUR CONNECTIVITY EXPERTS

Why choose Flexifi?

What do we do?

- > site-specific surveying
- > track and location
- > cable installation
- > secure containment
- > civil engineering and infrastructure build
- > network diversion and circuit shifts
- > swift deployment of 4G/mobile broadband UK-wide
- > site consultation and connectivity review

We specialise in creating bespoke solutions such as this fixed wireless access and point to point system, providing transformational connectivity to a remote quarry site.

Our IPAF certified engineers have installed the satellite system, Starlink, with failover at 2 sites delivering fantastic results.
